Dear ADEQ,

I am contacting you to encourage you to approve C&H's permit application. C&H Hog Farm is a family owned and operated farm and the farm is their livelihood. They have done everything that they were supposed to do to be in compliance. The U of A Big Creek Research and Extension Team has been collecting data since September 2013 and have found no problems. Since there is no scientific evidence that the hog farm is causing any problem to the environment, I'm in favor of ADEQ approving their permit application.

Sincerely,

Mark Keaton
