Questions Comments:

I just drove to Parthenon, Ar. and was so saddened to see all the dead foliage from herbicide sprayed all along our waterways on the way to Parthenon. It was way more sad to see this than the tornado damage which was a lot. I've talked with the Steve Lawrence at the Road Dept. in Harrison and he says he takes his kids out spraying herbicide with him. He doesn't care. The companies making the herbicides are now being made to put on the label that it can cause cancer and birth defects, etc. Not to mention that it kills fish and frogs, etc. We have a Karst topography in Newton County which means that there are sink holes and caves everywhere and those toxic chemicals are going right into our drinking water well and swimming holes. PLEASE make them stop. This is suppose to be the Natural State. So many of us move out here to get away from toxic chemicals. Thank you for changing this very unhealthy practice.
