Questions Comments:

ADEQ: I'm not sure you actually an agency that represents the citizens of Arkansas and protects their environment, or if you are just a corporate protection device funded by taxpayer dollars. The C&H (aka: Cargill) hog operation should NEVER have been allowed at this location to begin with. Those responsible should lose their jobs. You hold these hearings as a sort of smokescreen behind which you have already made your decision. Let's get this straight : Just because you say it's legal, doesn't mean it's morally acceptable or defensible. I challenge you to make the only right decision and deny the permit to C&H. Mac McFarland Bella Vista, Ar.
