I request that C&H hog facility be denied a permit. In today's world of 7 billion people it is difficult sometimes on where to draw the line of economy versus natural protection. The issue is the right of the hog farm owner to operate the farm without government regulation versus the rights of the taxpayers of the entire country to keep this national river all natural. There is only one Buffalo River. It is our duty and obligation to keep the Buffalo National River watershed clean. I am concerned about the risk the ADEQ is taking by allowing the farm to operate on karst near the Buffalo National River. I request that C&H hog facility be denied a permit.
