Subject: [BULK] Please deny permit for hog factory above National River
Date: Wednesday, March 29, 2017 8:05:11 PM

Please deny the Regulation 5 permit for the C&H swine factory in the Buffalo River watershed.

The Buffalo River is a national treasure, as indicated by its status as a National River. Experience tells us that waste from large hog operations such as the one for which permit is sought cannot be safely and reliably contained. It's simply not been possible.

Please save this precious resource and the economic benefit it brings to the State of Arkansas.

Thank you for considering my comments.
