

To Whomever it may Concern

I would like you to live up to the office that has been entrusted to you and strongly protect our water and air.

Specifically I refer to the hog farms situated near the Buffalo River. We can be so proud of the fact, that we the people of Arkansas, saved the river from being dammed and as a result millions of people have enjoyed its beauty and pristineness. Look at North Carolina to see the disastrous results of letting these farms go unregulated and placing them in vulnerable areas. Fecal matter has been detected in the Buffalo. I trust that you will close these farms down and send a strong message to corporations who think they have the right to subject people to their harmful practices. Please fulfill the duty that is your job. Keep the Buffalo and Arkansas the treasures they are!!!

Sincerely

Margaret White
