Please accept my comment on the C&H Hog CAFO.

I am distressed to learn of the possible or actual damage to the Buffalo River through waste from the C&H Hog Farm. My family has enjoyed canoeing and camping (and swimming) on and in this beautiful river for many years. To think that it could be knowingly polluted from any source is beyond comprehension. As our first officially designated national river, the public should be outraged if every effort to maintain the river's beauty and safety is not taken.

I would think that future 'tourism' dollars may be lost, and that factor should also be determinative in keeping the Buffalo as pristine as possible.

Thank you for entering my comment into your official public hearing/written statements.
