**Subject:** Please halt the C&H hog facility near the Buffalo  
**Date:** Friday, March 17, 2017 3:55:58 PM

---

I am writing to express my concern over the proposed permitting of a C&H hog facility near the Buffalo river. The environmental repercussions for allowing this facility to be built on nearby karst, particularly with a regulation 5 permit, are too great to warrant it proceeding.

As you know the Buffalo is a source of immense beauty and the country's first national river. Thousands of Arkansans and tourists from other states visit the river each year and I believe that allowing a facility of this nature to be built could ruin the prestige of the river for decades to come.

I want my children and their children to be able to be able to appreciate the river in the same way I have.

Please consider this when making your decision about moving forward.

Sincerely,  
Nathan Crowder
