Dear Gov. Hutchinson (and AEDQ),

It's not too late to save the Buffalo River from C&H Hog Farm pollution. However, we are perilously close to losing this precious state and federal resource.

It is imperative that the current permit continue to be subject to review. It would be optimum to revoke the permit, which was granted without due process, notification or comment. This CAFO should never have been allowed in this environmentally sensitive area and we cannot allow any more.

How do you see your legacy as governor? Do you want to be remembered as the governor who saved the Buffalo River (again)? Or will you go down in history as the governor who refused to protect this natural resource and allowed private interests to pollute and destroy this public treasure?

Please be the governor we can thank for preserving and protecting the Buffalo for future generations.

Nancy S. Ward
