Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

Thank you for opportunity to submit my comments and concerns. I am writing to ask you to deny the C&H Hog Farms, Inc., application for permit 5264-W based on the threat the operation poses to our first national river.

The wildlife in the Buffalo National River watershed depends on a healthy ecosystem, and the hundreds of thousands of tourists who visit the region each year to fish, kayak, swim and hike expect clean water. But all of that is at risk. The hogs generate more than 2.5 million gallons of urine and feces annually that has the potential to seep through the porous ground and eventually into the river. As the nation's first national river and a unit of the National Park System, the Buffalo National River belongs to all Americans and its protection now, and for future generations, is important to me.

Sincerely,

Ms. Lynn C. Lang

Dear Director Keogh,

Thank you for opportunity to submit my comments and concerns. I am writing to ask you to deny the C&H Hog Farms, Inc., application for permit 5264-W based on the threat the operation poses to our first national river.

The wildlife in the Buffalo National River watershed depends on a healthy ecosystem, and the hundreds of thousands of tourists who visit the region each year to fish, kayak, swim and hike expect clean water. But all of that is at risk. The hogs generate more than 2.5 million gallons of urine and feces annually that has the potential to seep through the porous ground and eventually into the river. As the nation's first national river and a unit of the National Park System, the Buffalo National River belongs to all Americans and its protection now, and for future generations, is important to me.

Sincerely,

Ms. Pam Bartholomew

Subject: Deny C&H Hog Farms, Inc. Application for Permit 5264-W
Date: Thursday, March 02, 2017 10:58:14 AM

Mar 2, 2017

Director Becky Keogh
Arkansas Department of Environmental Quality, 5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Director Keogh,

Thank you for opportunity to submit my comments and concerns. I am writing to ask you to deny the C&H Hog Farms, Inc., application for permit 5264-W based on the threat the operation poses to our first national river.

The wildlife in the Buffalo National River watershed depends on a healthy ecosystem, and the hundreds of thousands of tourists who visit the region each year to fish, kayak, swim and hike expect clean water. But all of that is at risk. The hogs generate more than 2.5 million gallons of urine and feces annually that has the potential to seep through the porous ground and eventually into the river. As the nation's first national river and a unit of the National Park System, the Buffalo National River belongs to all Americans and its protection now, and for future generations, is important to me.

Sincerely,

Miss Audrey Morgan

Dear Director Keogh,

Thank you for opportunity to submit my comments and concerns. I am writing to ask you to deny the C&H Hog Farms, Inc., application for permit 5264-W based on the threat the operation poses to our first national river.

Enough is enough. Producers must contain & clean their waste, not leave it to eventually ruin rivers & land.

The wildlife in the Buffalo National River watershed depends on a healthy ecosystem, and the hundreds of thousands of tourists who visit the region each year to fish, kayak, swim and hike expect clean water. But all of that is at risk. The hogs generate more than 2.5 million gallons of urine and feces annually that has the potential to seep through the porous ground and eventually into the river. My goodness! Don't we realize that Water is our most precious resource -- far more than oil or coal --especially with our population explosion.

Please protect this natural resource and deny the permit to the hog farm!
