Director Becky Keogh  
Arkansas Department of Environmental Quality, 5301 Northshore Drive  
North Little Rock, AR 72118-5317

Dear Director Keogh,

Thank you for opportunity to submit my comments and concerns. I am writing to ask you to deny the C&H Hog Farms, Inc., application for permit 5264-W based on the threat the operation poses to our first national river.

The wildlife in the Buffalo National River watershed depends on a healthy ecosystem, and the hundreds of thousands of tourists who visit the region each year to fish, kayak, swim and hike expect clean water. But all of that is at risk. The hogs generate more than 2.5 million gallons of urine and feces annually that has the potential to seep through the porous ground and eventually into the river. As the nation's first national river and a unit of the National Park System, the Buffalo National River belongs to all Americans and its protection now, and for future generations, is important to me.

Sincerely,

Mr. Richard Gast

Dear Director Keogh,

Thank you for opportunity to submit my comments and concerns. I do not require a response.

I am writing to ask you to deny the C&H Hog Farms, Inc., application for permit 5264-W based on the threat the operation poses to the Buffalo National River. I live in an agricultural state (Wisconsin) and have seen, smelled, and experienced the effect that large (usually corporate) farms have on the surrounding watersheds and communities. Allowing this permit will set a distressing and destructive precedent all over the U.S.

Sincerely,  
Holly

Mar 3, 2017

Director Becky Keogh  
Arkansas Department of Environmental Quality, 5301 Northshore Drive  
North Little Rock, AR 72118-5317

Dear Director Keogh,

Thank you for opportunity to submit my comments and concerns. I am writing to ask you to deny the C&H Hog Farms, Inc., application for permit 5264-W based on the threat the operation poses to our first national river.

The wildlife in the Buffalo National River watershed depends on a healthy ecosystem, and the hundreds of thousands of tourists who visit the region each year to fish, kayak, swim and hike expect clean water. But all of that is at risk. The hogs generate more than 2.5 million gallons of urine and feces annually that has the potential to seep through the porous ground and eventually into the river. As the nation's first national river and a unit of the National Park System, the Buffalo National River belongs to all Americans and its protection now, and for future generations, is important to me.

Sincerely,

Dr. josh pelleg

Mar 3, 2017

Director Becky Keogh  
Arkansas Department of Environmental Quality, 5301 Northshore Drive  
North Little Rock, AR 72118-5317

Dear Director Keogh,

Thank you for opportunity to submit my comments and concerns. I am writing to ask you to deny the C&H Hog Farms, Inc., application for permit 5264-W based on the threat the operation poses to our first national river.

The wildlife in the Buffalo National River watershed depends on a healthy ecosystem, and the hundreds of thousands of tourists who visit the region each year to fish, kayak, swim and hike expect clean water. But all of that is at risk. The hogs generate more than 2.5 million gallons of urine and feces annually that has the potential to seep through the porous ground and eventually into the river. As the nation's first national river and a unit of the National Park System, the Buffalo National River belongs to all Americans and its protection now, and for future generations, is important to me.

Sincerely,

Ms. Kristen Rangel  
55 Robin Hill Rd  
Chelmsford, MA 01824-3841

The wildlife in the Buffalo National River watershed depends on a healthy ecosystem, and the hundreds of thousands of tourists who visit the region each year to fish, kayak, swim and hike expect clean water. But all of that is at risk. The hogs generate more than 2.5 million gallons of urine and feces annually that has the potential to seep through the porous ground and eventually into the river. As the nation's first national river and a unit of the National Park System, the Buffalo National River belongs to all Americans and its protection now, and for future generations, is important to me.

Sincerely,

Mrs. Jill Fogg

North Little Rock, AR 72118-5317

Dear Director Keogh,

Thank you for opportunity to submit my comments and concerns. I am writing to ask you to deny the C&H Hog Farms, Inc., application for permit 5264-W based on the threat the operation poses to our first national river.

The wildlife in the Buffalo National River watershed depends on a healthy ecosystem, and the hundreds of thousands of tourists who visit the region each year to fish, kayak, swim and hike expect clean water. But all of that is at risk. The hogs generate more than 2.5 million gallons of urine and feces annually that has the potential to seep through the porous ground and eventually into the river. As the nation's first national river and a unit of the National Park System, the Buffalo National River belongs to all Americans and its protection now, and for future generations, is important to me.

Sincerely,

Ms. Michele Shipp

Director Becky Keogh  
Arkansas Department of Environmental Quality, 5301 Northshore Drive  
North Little Rock, AR 72118-5317

Dear Director Keogh,

Thank you for opportunity to submit my comments and concerns. I am writing to ask you to deny the C&H Hog Farms, Inc., application for permit 5264-W based on the threat the operation poses to our first national river.

The wildlife in the Buffalo National River watershed depends on a healthy ecosystem, and the hundreds of thousands of tourists who visit the region each year to fish, kayak, swim and hike expect clean water. But all of that is at risk. The hogs generate more than 2.5 million gallons of urine and feces annually that has the potential to seep through the porous ground and eventually into the river. As the nation's first national river and a unit of the National Park System, the Buffalo National River belongs to all Americans and its protection now, and for future generations, is important to me.

Sincerely,

Mr. Chris Moore

Dear Director Keogh,

Pig shit. You are going to treat the American People to Pig Shit?

You might remember the floods in NC that toppled the tanks and flooded half of the state. So you are now going to allow that on The Buffalo? Pig Shit! And I am guessing that you have never seen one of these industrial pig production facilities because if you did, you would never allow this to happen.

Deny the C&H Hog Farms, Inc., application for permit 5264-W based on the threat the operation poses to our first national river.

Director Becky Keogh  
Arkansas Department of Environmental Quality, 5301 Northshore Drive  
North Little Rock, AR 72118-5317

Dear Director Keogh,

Thank you for opportunity to submit my comments and concerns. I am writing to ask you to deny the C&H Hog Farms, Inc., application for permit 5264-W based on the threat the operation poses to our first national river.

The wildlife in the Buffalo National River watershed depends on a healthy ecosystem, and the hundreds of thousands of tourists who visit the region each year to fish, kayak, swim and hike expect clean water. But all of that is at risk. The hogs generate more than 2.5 million gallons of urine and feces annually that has the potential to seep through the porous ground and eventually into the river. As the nation's first national river and a unit of the National Park System, the Buffalo National River belongs to all Americans and its protection now, and for future generations, is important to me.

Sincerely,

Ms. Ann Pryich

The wildlife in the Buffalo National River watershed depends on a healthy ecosystem, and the hundreds of thousands of tourists who visit the region each year to fish, kayak, swim and hike expect clean water. But all of that is at risk. The hogs generate more than 2.5 million gallons of urine and feces annually that has the potential to seep through the porous ground and eventually into the river. As the nation's first national river and a unit of the National Park System, the Buffalo National River belongs to all Americans and its protection now, and for future generations, is important to me.

Sincerely,

North Little Rock, AR 72118-5317

Dear Director Keogh,

Thank you for opportunity to submit my comments and concerns. I am writing to ask you to deny the C&H Hog Farms, Inc., application for permit 5264-W based on the threat the operation poses to our first national river.

The wildlife in the Buffalo National River watershed depends on a healthy ecosystem, and the hundreds of thousands of tourists who visit the region each year to fish, kayak, swim and hike expect clean water. But all of that is at risk. The hogs generate more than 2.5 million gallons of urine and feces annually that has the potential to seep through the porous ground and eventually into the river. As the nation's first national river and a unit of the National Park System, the Buffalo National River belongs to all Americans and its protection now, and for future generations, is important to me.

Sincerely,

Mrs. Victoria Disalvo  
3390 Mogadore Rd  
Tallmadge, OH 44278-3514

Dear Director Keogh,

This misuse of a waterway must stop. C&H is obliged to be responsible business owners. The average "person" does not have the right to pollute the environment and neither does this company. DO NOT ALLOW this hog farm to continue or increase its nasty business of pollution of a watershed. Thank you for opportunity to submit my comments and concerns. I am writing to ask you to deny the C&H Hog Farms, Inc., application for permit 5264-W based on the threat the operation poses to our first national river.

Mar 3, 2017

Director Becky Keogh  
Arkansas Department of Environmental Quality, 5301 Northshore Drive  
North Little Rock, AR 72118-5317

Dear Director Keogh,

Thank you for opportunity to submit my comments and concerns. I am writing to ask you to deny the C&H Hog Farms, Inc., application for permit 5264-W based on the threat the operation poses to our first national river.

The wildlife in the Buffalo National River watershed depends on a healthy ecosystem, and the hundreds of thousands of tourists who visit the region each year to fish, kayak, swim and hike expect clean water. But all of that is at risk. The hogs generate more than 2.5 million gallons of urine and feces annually that has the potential to seep through the porous ground and eventually into the river. As the nation's first national river and a unit of the National Park System, the Buffalo National River belongs to all Americans and its protection now, and for future generations, is important to me.

Sincerely,

Mrs. Patricia Uchida  
6175 Woodland Dr  
Ogden, UT 84403-5427

The wildlife in the Buffalo National River watershed depends on a healthy ecosystem, and the hundreds of thousands of tourists who visit the region each year to fish, kayak, swim and hike expect clean water. But all of that is at risk. The hogs generate more than 2.5 million gallons of urine and feces annually that has the potential to seep through the porous ground and eventually into the river. As the nation's first national river and a unit of the National Park System, the Buffalo National River belongs to all Americans and its protection now, and for future generations, is important to me.

Sincerely,

Ms. Mary Zie

Director Becky Keogh  
Arkansas Department of Environmental Quality, 5301 Northshore Drive  
North Little Rock, AR 72118-5317

Dear Director Keogh,

Thank you for opportunity to submit my comments and concerns. I am writing to ask you to deny the C&H Hog Farms, Inc., application for permit 5264-W based on the threat the operation poses to our first national river.

The wildlife in the Buffalo National River watershed depends on a healthy ecosystem, and the hundreds of thousands of tourists who visit the region each year to fish, kayak, swim and hike expect clean water. But all of that is at risk. The hogs generate more than 2.5 million gallons of urine and feces annually that has the potential to seep through the porous ground and eventually into the river. As the nation's first national river and a unit of the National Park System, the Buffalo National River belongs to all Americans and its protection now, and for future generations, is important to me.

I live in Weld County in Colorado where we had a similar issue over 20 years ago. National Farms built a hog farm close to the South Platte River east of Greeley. After numerous violations of environmental protections, the facility was shut down. Massive hog farms are cruel to the animals and an environmental disaster to nearby watersheds. I urge you to deny the C&H Hog Farms, Inc. application for permit 5264-W.

Our waterways deserve our protection from potential pollution.

Thank you for your careful consideration of my comments.

Sincerely,

Mrs. Barb Tokunaga

Dear Director Keogh,

These lg facilities waste is & always has been a problem. They are just too big. C&H needs to be responsible for the waste their product produces & find ways to dispose of it without contaminating the environment. I have to pay a Co to take & dispose of my trash. Why should I have to deal with All the expenses in dollars & contamination of environment their waste produces?

Thank you for opportunity to submit my comments and concerns. I am writing to ask you to deny the C&H Hog Farms, Inc., application for permit 5264-W based on the threat the operation poses to our first national river.

Arkansas Department of Environmental Quality, 5301 Northshore Drive  
North Little Rock, AR 72118-5317

Dear Director Keogh,

Thank you for opportunity to submit my comments and concerns. I am writing to ask you to deny the C&H Hog Farms, Inc., application for permit 5264-W based on the threat the operation poses to our first national river.

The wildlife in the Buffalo National River watershed depends on a healthy ecosystem, and the hundreds of thousands of tourists who visit the region each year to fish, kayak, swim and hike expect clean water. But all of that is at risk. The hogs generate more than 2.5 million gallons of urine and feces annually that has the potential to seep through the porous ground and eventually into the river. As the nation's first national river and a unit of the National Park System, the Buffalo National River belongs to all Americans and its protection now, and for future generations, is important to me.

Sincerely,

Ms. Deborah Fexis

Dear Director Keogh,

Thank you for opportunity to submit my comments and concerns. I am writing to ask you to deny the C&H Hog Farms, Inc., application for permit 5264-W based on the threat the operation poses to our first national river.

I spent many happy hours swimming and hiking in and along the Buffalo as a young man when my grand parents moved to Berryville. I have since taken my own family and hope to take my grand children to the same place I have come to love. The wildlife in the Buffalo National River watershed depends on a healthy ecosystem, and the hundreds of thousands of tourists who visit the region each year to fish, kayak, swim and hike expect clean water. But all of that is at risk. The hogs generate more than 2.5 million gallons of urine and feces annually that has the potential to seep through the porous ground and eventually into the river. Mar 3, 2017

Director Becky Keogh  
Arkansas Department of Environmental Quality, 5301 Northshore Drive  
North Little Rock, AR 72118-5317

Dear Director Keogh,

Thank you for opportunity to submit my comments and concerns. I am writing to ask you to deny the C&H Hog Farms, Inc., application for permit 5264-W based on the threat the operation poses to our first national river.

The wildlife in the Buffalo National River watershed depends on a healthy ecosystem, and the hundreds of thousands of tourists who visit the region each year to fish, kayak, swim and hike expect clean water. But all of that is at risk. The hogs generate more than 2.5 million gallons of urine and feces annually that has the potential to seep through the porous ground and eventually into the river. As the nation's first national river and a unit of the National Park System, the Buffalo National River belongs to all Americans and its protection now, and for future generations, is important to me.

Sincerely,

Dr. Jerry Horner

Dear Director Keogh,

Thank you for opportunity to submit my comments and concerns. I am writing to ask you to deny the C&H Hog Farms, Inc., application for permit 5264-W based on the threat the operation poses to our first national river.

The wildlife in the Buffalo National River watershed depends on a healthy ecosystem, and the hundreds of thousands of tourists who visit the region each year to fish, kayak, swim and hike expect clean water. But all of that is at risk. The hogs generate more than 2.5 million gallons of urine and feces annually that has the potential to seep through the porous ground and eventually into the river. As the nation's first national river and a unit of the National Park System, the Buffalo National River belongs to all Americans and its protection now, and for future generations, is important to me.

Spoiling our waterways is not acceptable especially with waste from animals, such as the hogs, because their waste has bacteria and eColi. Our precious waterways need to be protected before we loose them.

Sincerely,

Mrs. BEVERLY JENNINGS

Mar 2, 2017

Director Becky Keogh  
Arkansas Department of Environmental Quality, 5301 Northshore Drive  
North Little Rock, AR 72118-5317

Dear Director Keogh,

Thank you for opportunity to submit my comments and concerns. I am writing to ask you to deny the C&H Hog Farms, Inc., application for permit 5264-W based on the threat the operation poses to our first national river.

Please protect the environment.

The wildlife in the Buffalo National River watershed depends on a healthy ecosystem, and the hundreds of thousands of tourists who visit the region each year to fish, kayak, swim and hike expect clean water. But all of that is at risk. The hogs generate more than 2.5 million gallons of urine and feces annually that has the potential to seep through the porous ground and eventually into the river. As the nation's first national river and a unit of the National Park System, the Buffalo National River belongs to all Americans and its protection now, and for future generations, is important to me.

Sincerely,

Mr. Donald Goppert  
9059 Kyser Beach Rd

Dear Director Keogh,

Thank you for opportunity to submit my comments and concerns. I am writing to ask you to deny the C&H Hog Farms, Inc., application for permit 5264-W based on the threat the operation poses to our first national river.

The wildlife in the Buffalo National River watershed depends on a healthy ecosystem, and the hundreds of thousands of tourists who visit the region each year to fish, kayak, swim and hike expect clean water. But all of that is at risk. The hogs generate more than 2.5 million gallons of urine and feces annually that has the potential to seep through the porous ground and eventually into the river. As the nation's first national river and a unit of the National Park System, the Buffalo National River belongs to all Americans and its protection now, and for future generations, is important to me.

Sincerely,

Mrs. Myrna Lipman

Director Becky Keogh  
Arkansas Department of Environmental Quality, 5301 Northshore Drive  
North Little Rock, AR 72118-5317

Dear Director Keogh,

Thank you for opportunity to submit my comments and concerns. I am writing to ask you to deny the C&H Hog Farms, Inc., application for permit 5264-W based on the threat the operation poses to our first national river.

The wildlife in the Buffalo National River watershed depends on a healthy ecosystem, and the hundreds of thousands of tourists who visit the region each year to fish, kayak, swim and hike expect clean water. But all of that is at risk. The hogs generate more than 2.5 million gallons of urine and feces annually that has the potential to seep through the porous ground and eventually into the river. As the nation's first national river and a unit of the National Park System, the Buffalo National River belongs to all Americans and its protection now, and for future generations, is important to me.

Sincerely,

Ms. Elaine Jakubco

Mar 3, 2017

Director Becky Keogh  
Arkansas Department of Environmental Quality, 5301 Northshore Drive  
North Little Rock, AR 72118-5317

Dear Director Keogh,

Thank you for opportunity to submit my comments and concerns. I am writing to ask you to deny the C&H Hog Farms, Inc., application for permit 5264-W based on the threat the operation poses to our first national river.

The wildlife in the Buffalo National River watershed depends on a healthy ecosystem, and the hundreds of thousands of tourists who visit the region each year to fish, kayak, swim and hike expect clean water. But all of that is at risk. The hogs generate more than 2.5 million gallons of urine and feces annually that has the potential to seep through the porous ground and eventually into the river. As the nation's first national river and a unit of the National Park System, the Buffalo National River belongs to all Americans and its protection now, and for future generations, is important to me.

Sincerely,

Mrs. Ira Gerard-Di Benedetto

The wildlife in the Buffalo National River watershed depends on a healthy ecosystem, and the hundreds of thousands of tourists who visit the region each year to fish, kayak, swim and hike expect clean water. But all of that is at risk. The hogs generate more than 2.5 million gallons of urine and feces annually that has the potential to seep through the porous ground and eventually into the river. As the nation's first national river and a unit of the National Park System, the Buffalo National River belongs to all Americans and its protection now, and for future generations, is important to me.

Sincerely,

Ms. Leslie Harbold

Director Becky Keogh  
Arkansas Department of Environmental Quality, 5301 Northshore Drive  
North Little Rock, AR 72118-5317

Dear Director Keogh,

Please do the right thing and deny the C&H Hog Farms, Inc., application for permit 5264-W based on the threat the operation poses to our first national river. Why on earth would anyone think that allowing a hog farm to release pig waste into a river is a good idea? Allowing the Buffalo National River watershed to become polluted with hog urine and feces will not exactly bring tourists and their dollars into the watershed as I imagine that kayaking and swimming in pig waste polluted waters isn't very desirable.. We should be doing all we can to protect our precious water supplies, not allow them to be poisoned by whatever industry is paying off politicians to do their bidding.

The wildlife in the Buffalo National River watershed depends on a healthy ecosystem, and the hundreds of thousands of tourists who visit the region each year to fish, kayak, swim and hike expect clean water. But all of that is at risk. The hogs generate more than 2.5 million gallons of urine and feces annually that has the potential to seep through the porous ground and eventually into the river. Mar 3, 2017

Director Becky Keogh  
Arkansas Department of Environmental Quality, 5301 Northshore Drive  
North Little Rock, AR 72118-5317

Dear Director Keogh,

Thank you for opportunity to submit my comments and concerns. I am writing to ask you to deny the C&H Hog Farms, Inc., application for permit 5264-W based on the threat the operation poses to our first national river.

The wildlife in the Buffalo National River watershed depends on a healthy ecosystem, and the hundreds of thousands of tourists who visit the region each year to fish, kayak, swim and hike expect clean water. But all of that is at risk. The hogs generate more than 2.5 million gallons of urine and feces annually that has the potential to seep through the porous ground and eventually into the river. As the nation's first national river and a unit of the National Park System, the Buffalo National River belongs to all Americans and its protection now, and for future generations, is important to me.

Sincerely,

Mr. Weldon Williams  
7626 N 140 E Avenue  
Owasso, OK 74055-7102

Mar 3, 2017

Director Becky Keogh  
Arkansas Department of Environmental Quality, 5301 Northshore Drive  
North Little Rock, AR 72118-5317

Dear Director Keogh,

Thank you for opportunity to submit my comments and concerns. I am writing to ask you to deny the C&H Hog Farms, Inc., application for permit 5264-W based on the threat the operation poses to our first national river.

The wildlife in the Buffalo National River watershed depends on a healthy ecosystem, and the hundreds of thousands of tourists who visit the region each year to fish, kayak, swim and hike expect clean water. But all of that is at risk. The hogs generate more than 2.5 million gallons of urine and feces annually that has the potential to seep through the porous ground and eventually into the river. As the nation's first national river and a unit of the National Park System, the Buffalo National River belongs to all Americans and its protection now, and for future generations, is important to me.

Sincerely,

Mr. Sean Corrigan  
219 Lae Street

The wildlife in the Buffalo National River watershed depends on a healthy ecosystem, and the hundreds of thousands of tourists who visit the region each year to fish, kayak, swim and hike expect clean water. But all of that is at risk. The hogs generate more than 2.5 million gallons of urine and feces annually that has the potential to seep through the porous ground and eventually into the river. As the nation's first national river and a unit of the National Park System, the Buffalo National River belongs to all Americans and its protection now, and for future generations, is important to me.

Sincerely,

As the nation's first national river and a unit of the National Park System, the Buffalo National River belongs to all Americans and its protection now, and for future generations, is important to me.

We have stopped the use of rivers for raw sewage disposal in most cases for industrial and human beings. Please include hog farming as well. Each farming and manufacturing enterprise should be willing and able to not pollute other areas of our country, and be responsible for the proper treatment of waste that is generated. This cost may be passed on to the consumer, however, we only have one world and water is a necessity for life, not only for hogs but also people.

Thank you for your consideration in this matter.

Mar 2, 2017

Director Becky Keogh  
Arkansas Department of Environmental Quality, 5301 Northshore Drive  
North Little Rock, AR 72118-5317

Dear Director Keogh,

Thank you for opportunity to submit my comments and concerns. I am writing to ask you to deny the C&H Hog Farms, Inc., application for permit 5264-W based on the threat the operation poses to our first national river.

The wildlife in the Buffalo National River watershed depends on a healthy ecosystem, and the hundreds of thousands of tourists who visit the region each year to fish, kayak, swim and hike expect clean water. But all of that is at risk. The hogs generate more than 2.5 million gallons of urine and feces annually that has the potential to seep through the porous ground and eventually into the river. As the nation's first national river and a unit of the National Park System, the Buffalo National River belongs to all Americans and its protection now, and for future generations, is important to me.

Sincerely,

Ms. Mary Johannsen  
2418 Aldrich Ave N
