Dear ADEQ

Re: C & H Farms Land Application of Hog Waste Permit request

I own a house and 60 acres in Newton County not far from the Buffalo River.

Let me be clear that I adamantly oppose this application to spread tons of liquid hog waste on fields around Newton County.

For reasons that include the porous limestone beneath much of the county it would be insane to grant this application which would surely damage ground water supplies and almost certainly lead to pollution of the Buffalo River.

Please turn down the request

Ray Hanley
