Mr. Quick,

As you are aware, the Department received several thousand of comments during the public comment period. The Department is in the process of reviewing all these comments and providing responses to all of them. Once the Department completes the review process for all the comments, the Department will provide the complete response to comments and its final permitting decision to all the commenters. The response to your comment will also be provided at that time. Thanks.

Jamal Solaimanian, Ph.D., P.E.

Subject: R. Quick C&H Draft Regulation 5 Permit Comments

Jamal,

I realize the Department has received numerous comments regarding the referenced draft permit and formulating responses will take time. My April 6, 2017 comments primarily address Citation 5.402 in Regulation 5. In particular, my comments specifically ask for geologic, hydrogeologic, engineering and administrative responses. I recognize the administrative comments and my opinions are not part of Regulation 5, but some of them should be addressed.

Please advise when my comments will be addressed.

Thanks

Ray
