Sirs,

I implore you to issue the above referenced farm a liquid animal waste permit. This family farm has done everything possible to meet all federal and state guidelines and have complied with every request from every agency. How much more do they have to prove? The misguided individuals who oppose agricultural interests and farms forget that they go to bed at night with full stomachs. When that changes and production agriculture no longer exists, where are they going to get their food? I am a farmer and I assure them they don't need to come to my door when they get hungry.

Roger Thompson, LUTCF
