Kelly,

Below is the response to Mrs. Bitting's request.

The BCRET study was used to select parameters for Table III of Part I for the continued monitoring and reporting requirements for the interceptor trenches. The sources listed in the Statement of Basis are the list of sources used to draft the permit. I do not have any data from the sources listed in your email.

Thanks,
Katherine McWilliams

Subject: [BULK] C&H permit

Hi Katherine,

Permit 5264-WR

I am hoping you can answer some questions for me and your name is on the permit announcement. If you can't can you direct me to the person who can?

- 1) Were any other data or information from BCRET, besides the quarterly reports that can be found online, used in drafting this permit?
- 2) What information from the BCRET quarterly reports was used to draft this permit?
- 3) Is the list of sources on p. 6 (Statement of Basis #14) a comprehensive list of all data and information used in drafting this permit?
- 4) Did you use Dr. Joe Nix's Big Creek Water Quality report?
- 5) Did you use Dr. Brahana's dye trace?
- 6) Did you use NPS data or the ADH?

I am searching for some information and hopefully you can help me find it. In the past I have received the data that BCRET, Department of Health and NPS compiled on Big Creek.

Do you have an update of that data? The last date I received was from May 2015. This is the CH file all data compiled. I can send it to you to update if you need to see what I'm looking for. If I can get it in a spreadsheet as before that is even better.

Thank you,
Carol Bitting
