Subject: Re: C & H Hog Factory Farm
Date: Wednesday, March 15, 2017 11:04:57 AM

Due to the environmental impact (increased nitrogen pollution in Big Creek) I am opposed to the issuance of a state permit allowing C & H. Hog Factory Farm to build a new facility on the Buffalo River watershed. It is my understanding that a state permit supercedes the Federal Permit, has no expiration date and does not call for regular reviews. The Buffalo River is an Arkansas treasure bringing many to the state for recreational and fishing enterprises. It deserves to be protected and I cannot believe that the hog farm was allowed to build such a massive facility near the Buffalo River watershed in the first place. There is much vacant land in Arkansas but once a thing of beauty is destroyed it cannot be replaced.
