---

The massive amounts of waste being collected and then spread on fields has bacteria that are harmful to people swimming in the Buffalo River - it will percolate down, run-off, and end up, along with soil particles, in the Buffalo. Avoid this massive PR and health problem, resulting in the River getting a "black-eye" to the important and vital tourism industry in northern Arkansas.

Do not allow more, deny this permit.

Sincerely,  
Sue Lukens
