Dear Sir:

This letter is written to oppose the permitting of the C and H Hog Farm near Mt. Judea, Newton County Arkansas.

We think the hog farm represents unacceptable risks to the Buffalo National River – a national treasure. We have floated this river since 1961 and took part in the move to “save” the river by developing the first and only National River in the United States while working with the Ozark Society. If this river is not protected for our grandchildren and their children we will have failed future generations. PLEASE deny the request for a new permit.

We ask that our comments be made a part of the public record in this comment period.

Sincerely,

A handwritten signature in black ink, appearing to read "Steve and Jo Wilson". The signature is written in a cursive, flowing style.

Steve and Jo Wilson
