As a floaters, campers and Boy Scout leaders, my husband Mark and I ask that you please, Please, PLEASE, deny the permit for the for the C&H Farm hog operation at Mt. Judea.

You know the reasons -- the karst formations that have already led to pollution in what has been a premiere, pristine river in the National Park system. We need every avenue open to control and eventually shut down this farm that was shamefully allowed to open in the first place. It is at the very least unfair to the businesses that have been and will be further hurt by the reckless decision to allow this farm in the first place. We all know that no matter what precautions are taken, the bottom line remains the same -- a polluted Buffalo National River.

Please deny.
