ADEQ

Please issue this farm a liquid animal waste permit.

I, along with many of my farmer friends are so tired of a few, with their agenda, who don't understand rural Arkansas, trying to push their ideals.

**The Facts about C&H Hog Farm:**

- It's a true family farm
- It's one of the most extensively studied farming operations in America
- **Scientific evidence** collected on and around the farm shows that the operation is having no negative impact on the environment

The farm meets (and often exceeds) environmental standards established by the state of Arkansas and the EPA
