Subject: Regulation 5 Permit for CH Swine Factory
Date: Tuesday, April 04, 2017 7:51:44 PM

Dear Governor Hutchinson & ADEQ:

Please deny the Regulation 5 permit for the C&H swine factory in the Buffalo River watershed. This industrial operation has no business in the geologically sensitive karst environment of our own national river. The Buffalo National River attracts thousands of visitors every year bringing millions of dollars to the local area and providing countless jobs to Arkansas citizens. Degradation of this beautiful natural resource could severely impact the local economy and endanger the health of those recreating on the river. Increased pollution on the river is a threat to native wildlife species. Please put the local Arkansas economy and the health of our National river, before corporate interests.

Regards

Victoria Amato
