RE: Response to EDCC's April 11, 2011 letter regarding TRE dilution series
NPDES No. AR0000752 AFIN: 70-00040

Dear Mr. Parker:

ADEQ agrees with the proposed revised dilution series for the TRE until such time as the NPDES permit renewal is effective. Outfall 006 shall have a dilution series of 22, 32, 42, 56, 75, and 100%. Outfall 007 shall have a dilution series of 32, 42, 50, 56, 75, and 100%. When the NPDES permit renewal is effective, the TRE dilution series for Outfalls 006 and 007 will reflect the dilution series that is stipulated in the new NPDES permit.

If you have any questions, please contact myself or Sarah Clem.

Sincerely,

Mary Barnett
Ecologist
