RE: Surface Water Containment Pond Closure Plan
AFIN: 02-00013; Permit No.: AR0001210

Dear Mr. Hudson:

The Department received a closure plan for the surface containment pond on May 6, 2013. The closure plan has been reviewed and is hereby approved. As specified in the closure plan, all liquids and solids must be removed from the pond and disposed of properly. Please note that records must be kept for all wastes removed and disposed of from the pond.

Please notify the NPDES Permits Section when the closure process is completed. You must also submit a closure certification from your consultant verifying that the facility has been closed and all waste disposed of according to the approved closure plan. Upon receipt of closure certification, a water division field inspector may visit the site to verify proper closure of the pond.

If you have any questions regarding the pond closure, please contact Stephen Hogan of the No-Discharge Section at (501) 682-0651.

Sincerely,

John Bailey, P.E.
Permits Branch Manager
Water Division
