**Subject:** GP Crossett Paper Operations Permit Modification AR0001210  
**Attachments:** GP Crossett AR0001210 Modification State Response 8-25-15.pdf

Dear Mr. Shafii:

We received the draft permit modification for Georgia Pacific LLC- Crossett Paper Operations on August 7, 2015. We understand Georgia Pacific, LLC requested a permit modification to add Hydrogen Peroxide and an Iron Catalyst at three points in the upper areas of the wastewater collection and treatment system. The primary scope of this modification is limited to the control of odor, and not to provide treatment of the wastewater. In accordance with 40 CFR 122.62, only the conditions subject to the modification are reopened, and EPA's review has been limited to the proposed modification.

EPA understands the value and the need for odor control, and we note that the addition of the odor control process has not resulted in any new or revised effluent limitations. We appreciate Arkansas Department of Environmental Quality keeping us informed of the State's permitting activity regarding this facility.

Should you have any questions, please contact me at (214) 665-7530 or by email to [burrell.monica@epa.gov](mailto:burrell.monica@epa.gov).

Sincerely,

*Monica Burrell*
