RE: NPDES Permit No. AR0001210, AFIN 02-00013  
Odor Control Measures

Dear Mr. Smith:

This letter is provided to follow-up on a meeting held on April 16, 2021, with Arkansas Department of Energy and Environment, Division of Environmental Quality (DEQ) staff and Georgia-Pacific Crossett LLC (GP) staff. In that meeting, DEQ requested that GP provide a plan for odor control measures for any work at the wastewater treatment facility that could cause an increase in the odor. During the meeting, GP indicated that it would provide the requested odor management plan when needed and that no work was currently planned that would require an odor management plan.

DEQ is requesting additional information regarding GP's process for evaluating when an odor management plan is needed and methods to determine appropriate odor control measures. The plan should identify how decisions are made when scheduling activities which may cause excessive odors, and discuss routine activities, and the associated best management practices to be expected during performance of those activities. The plan should identify upcoming activities or provide a method for notifications or updates to the odor plan as needed.

Please submit the plan as soon as possible but no later than July 30, 2021. If you have any questions, please contact me at [leamons@adeq.state.ar.us](mailto:leamons@adeq.state.ar.us) or at (501) 683-5406

Sincerely,

A handwritten signature in black ink that reads "Bryan Leamons".

Bryan Leamons, P.E.
