RE: NPDES Permit No. AR0001210, AFIN 02-00013
Septic Tank Replacement

Dear Mr. Hohnadel:

The Department has reviewed your correspondence dated March 22, 2018, requesting permission for replacement of an existing septic tank. Based on your correspondence, the existing septic tank will be removed from service and the new septic tank will be located in the same general area. The existing septic tank will be left in place and filled in with a suitable material. It is also the Department's understanding that flows to the wastewater treatment system are not expected to increase as a result of the replacement.

Reg. 6.202(C) states that, at the discretion of the Director, the provision of Reg. 6.202(B) may not apply to replacement of existing equipment. The Department is hereby granting the request to replace the existing septic tank with a like-kind replacement without the need to obtain a State Construction Permit. Please note that this letter does not preclude the need to obtain approval for this project from the Arkansas Department of Health.

If you have any questions, please contact Loretta Reiber, P.E. of the NPDES Permits Section at reiber@adeq.state.ar.us or by phone at (501) 682-0612.

Sincerely,

Caleb J. Osborne
Associate Director
Office of Water Quality

cc: Richard Healey, Enforcement Branch Manager
Jason Bolenbaugh, Compliance Branch Manager
David Ramsey, Environmental Program Coordinator

below the low-water surface.

(5) Appendix – Ground Disposal of Wastewaters

Land treatment of wastewater shall be in accordance with the Land Application Guidelines as promulgated by this department and the Arkansas Department of Health.

- (C) At the discretion of the Director, ~~the provisions of Reg.6.202(B) may not apply~~ to minor revision to the existing treatment system, routine repair, **replacement** (i.e. aerator) or maintenance.
- (D) Prior to obtaining a construction permit for domestic wastewater discharges from ADEQ, an approval letter from Arkansas Department of Health is required.

All information supplied to this Department shall be available for public inspection unless the information constitutes a trade secret and a claim of confidentiality is submitted in accordance with the procedures specified in Reg.6.105 above.

Reg.6.203 Permitting Requirements for Stormwater Discharges Associated with a Small Construction Site

Operators of a small construction sites shall be deemed to have a permit by rule for the purposes of the federal Clean Water Act, 33 U.S.C. § 1251 *et seq.*, and the Arkansas Water and Air Pollution Control Act, Ark. Code Ann. § 8-4-101 *et seq.*, if the following conditions are met:

- (A) A completed Notice of Coverage must be posted at the site for automatic permit coverage prior to commencing construction; and
- (B) A Stormwater Pollution Prevention Plan must be prepared in accordance with good engineering practices as follows:
 - (1) Identify potential, site-specific sources of pollution which may reasonably be expected to affect the quality of stormwater discharges from the construction;
 - (2) Identify, describe and ensure the implementation of site-specific Best Management Practices, with emphasis on initial site stabilization, which are to be used to reduce pollutants in stormwater discharges from the construction site;
 - (3) Identify the responsible party for on-site Stormwater Pollution Prevention Plan implementation;
 - (4) Develop a legible site map (or multiple maps, if necessary) complete to scale, showing the entire site, that identifies, at a minimum, the following:
 - (a) Pre-construction topographic view;
