AFIN 02-00013
Application for Renewal-Request to Remove Dieldrin Monitoring Requirement

Ms. Reiber:

Georgia-Pacific Crossett LLC (GP) submitted a renewal application as required for our NPDES Permit No. AR0001210 on May 4, 2015. Additionally, we make the following requests for the permit once drafted:

Dieldrin monitoring (Part I, Section A of current permit):

- Dieldrin limits were included in the last permit based on a single sampling detection data point in the last permit application. During the term of the current permit, we have had no quantifiable detections for dieldrin. GP does not use dieldrin or dieldrin-containing substances in any raw materials for our process or otherwise at our site. We request the removal of dieldrin permit limits from the future permit.

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

We appreciate the efforts of the ADEQ in processing this permit renewal. Should you have any questions about these comments, please contact Rachel Johnson at (870) 567-8170.

Sincerely,
