Subject: Ouachita River dumping

MEMORANDUM

FROM: LEO MILLER
DATE: MARCH 4, 2010

RE: Discharge Permit No. AR0001210, AFIN 02-00013: HEARING REQUEST

1. I attended a meeting March 2nd hosted by Ouachita Riverkeeper, which is a part of an international water keeper alliance. The purpose of the meeting was to explain the request by Ouachita Riverkeeper, a copy of which is attached, to the renewal of waste water permit by Georgia-Pacific, LLC in Crossett, Arkansas. The attachment further explains the hearing request. Let me synopsize what is occurring with respect to this request.
2. Arkansas Department of Environmental Quality has, without doubt, undertaken to do everything it can to prevent a timely hearing request filing. Thanks to Ouachita Riverkeeper, this request was timely done. A public hearing is not automatically granted. In other words, just because you ask for a hearing, it does not mean that you will get a hearing. However, the granting of a hearing will be more likely if there is a wide based public demand for it. What is needed, then, are comments on the hearing request from as many people and organizations as possible.
3. Discharge permits are granted for five year terms. Said another way, this is the only opportunity to secure relief from the Georgia Pacific dumping for five years. The current permit of Georgia-Pacific is an outrage. It allows Georgia-Pacific to dump incredibly toxic chemicals into the river, including

191062

dioxins. In addition, they can dump chemicals into the river which change the water color and have a noxious odor. In general, persons who dump chemicals into water cannot dump chemicals which have this effect when they cross state lines. Interestingly, the Ouachita River is a blue green color until just north of Crossett when the chemicals from Georgia-Pacific are dumped into it. South of Crossett, we have what we have. Said another way, the dark brown water that we are accustomed to is a result of but one thing: Georgia-Pacific chemical dumping. Should Georgia-Pacific be required to do what others are required to do, that is, follow the law, our water coming through Monroe would, within approximately one year, be a clear blue green color. All I can say is: wow!!!

4. I am lastly attaching a comment sheet which sets forth a statement that I present to everyone and ask for your approval. I ask that each person print and sign the comment sheet and immediately fax, scan and email, or mail to the address shown. Also, if you have any questions or further comments, or if there is something specific that you would like to add, I have attached a blank comment sheet. The comments must be in by March 17, so time is very short. If you have any questions, comments, or otherwise, please let me know. Thank you very much for your prompt consideration.

Best regards,

Leo Miller

Crossett, AR 71635

We, the undersigned, support each and every objective of Ouachita
Riverkeeper in their request for a public hearing as to the above
captioned discharge permit number. We unanimously assert that a
public hearing should be granted on this permit request. We are
aware that the discharge of Georgia-Pacific causes noxious odors in
the Ouachita River, and causes a distinct change in color of the
river water in Louisiana. Also, pollutant chemicals, particularly
dioxins, should not be dumped into the river unless there is a full
and complete compliance with all federal statutes and regulations,
as well as the statutes and regulations of the states of Louisiana
and Arkansas. Please grant a hearing on the referenced hearing
request.

Comments Re: Discharge Permit Number AR0001210, AFIN 02-00013
Georgia-Pacific LLC, Crossett Paper Operations
100 Mill Supply Road
Crossett, AR 71635

My property includes 700 linear feet of Bayou D'Arbonne water frontage, beginning 800 feet from the confluence (mouth) of Bayou D'Arbonne, at Ouachita River Mile 173.0, about 6 miles north of Monroe, LA.

Depending on the relative stages of the Bayou and the River, it is not uncommon for the Bayou to flow upstream, resulting in Ouachita River water at my frontage where my home is located.

My wife and I are both sensitive to any water-based environmental impacts due to human intervention in the content of the River and Bayou waters.

The Georgia-Pacific LLC Discharge Permit Number AR0001210, AFN 02-00013 is of particular interest to us, since we are a downstream entity that may be detrimentally affected.

We wish to have all information possible, at our disposal, in order to make an assessment of these discharges, including chemical, soluble and insoluble minerals content, volume, and frequency of the discharge events.

My wife and I deem it necessary for the Arkansas Department of Environmental Quality to hold a public hearing regarding the GP discharge permit, with printed information distribution, even though we are not citizens of the State of Arkansas.

Sincerely,

K. Terry Taylor

I am very displeased that I can't use the
Ouachita River for water sports such as skiing
and swimming and being afraid to eat the fish
from its water. and this is because you are
allowing the Georgia-Pacific LLC and C.O.K.F
Crossett Paper Operations to dump their
polluted waste water into the Ouachita River.
I know that the A.D.E.Q. can require them
to take the pollutants out of the waste water
before they dump it into the Ouachita River.
I am asking that A.D.E.Q. take immediate
action to get the dark color and foul odor
removed from their waste water and to make sure
that no hazardous Dispersions are present before they dump!

Crossett, AR 71635

I am wanting to complain about the damage to the water quality in the Ouachita River, caused by the wastewater that is being discharged by the Crossett, ark. paper operations and COKE LLC and Georgia-Pacific, LLC. As a frequent user of the Ouachita River, I am seeing the discolored water as well as the foul odor that this waste water from the Crossett facility is generating. I am asking the Arkansas Department of Environmental Quality to take immediate action to have the Crossett, ark. paper operations to clean up their waste water before discharging into the Ouachita River. Their polluted water is affecting the natural beauty of the Ouachita River and also restricting the use for fishing and water sports on the river.

I am writing this letter to express my
frustration and concern about A. D. E. Q. allowing
the Paper Operations, located at Crossett, Ar. to
dump their polluted waste water into the "would
be" beautiful Ouachita River. This polluted
water caused by Crossett paper operations is depriving
Louisiana residents from using the Ouachita
River and enjoying the pleasures that it provides.
We are seeing dark colored water and the unpleasant
odor caused by the paper operations waste water discharge
also we are afraid to eat the fish and swim
~~in the~~ or ski in the Ouachita River. I am not
being un-reasonable by asking that you require the
Crossett-Paper Operations to clean up their waste water
discharge before dumping it into the Ouachita River

I do want a hearing in Arkansas. We take our daughter to the Ouachita River in Monroe. They notice the smell & the brown color & we've all cut ourselves & got infections from the water. We tube, ski & swim there. We'd really like it to be cleaned up. It is a beautiful river & we are proud of it & want to ^{it be} preserved. Also someday we might use it for drinking water someday. There is a shortage of water.

I AM very worried about our
River. The FACT the mill in Crossett Ark.
has a permit to dump in the River close to
the Louisiana line. The very best they can
do is to have a public meeting about this
permit. So we can attend. All we want is
our part of the river to look + smell like
Ark. part of the river.

I have lived in Bastrop for 35 years. I fished the River at least 3 times a week. I made a mistake of going up River to where the Black water was dumped into the River. Since then I have not fished the River. When I found out about the Mercury in the water a man asked me what I did with the fish I caught out of the river. I said I give them to people I don't like.

I am not anti industry, in fact I am aware that we need jobs, I am also aware that that most industries and businesses will be more likely to expand if they have an abundance of good clean "unpolluted" water. Clean water promotes economic development. Polluted water is detrimental to economic development and reduces the sales and income created from the use of water sports and fishing equipment. So I am only asking that the A.D.E.Q. do their job and take immediate action to stop the polluted discharge of waste water being dumped into the Ouachita River by the Crossett, Arkansas Paper Operations. I will be keeping a watchful eye on this procedure.

The quality of the water in the Ouachita River from the Arkansas line south, virtually makes it non-usable, the water has such a dark color and puts a stain on everything it comes in contact with, including boats and piers. I love the water, I love to ski, swim, fish and boat ride, but I am being deprived of all of this because of the dark color, and terrible odor of the Ouachita river water, I am afraid it is very un-healthy for human use. We have been patient for many years, in hopes that A.D.E.Q. would stop this polluted discharge from the Crossett Paper Operations, located in Crossett, Ar. but it hasn't happened. I am now requesting that A.D.E.Q. do their job and have the pollutants removed from the Paper Operations discharge, before allowing them to dump into the Ouachita River, Thruway.

How can we be proud of our beautiful Ouachita River when it is so polluted that we can't drink it or play in it? Years ago it was the favorite place for family recreation.

Georgia Pacific should not be allowed a permit to pollute our river. We deserve to have a clean river like Arkansas.

This waste water dumping into our waters must be stopped as soon as possible!
