NPDES Permit No. AR0001210

Dear Ms. Reiber:

Georgia-Pacific Crossett LLC, Crossett Paper Operations plans to replace an existing sanitary sewer septic tank in the process of constructing a new building, which will house two new converting lines and a set of employee restrooms. This septic tank currently drains to the Wastewater Treatment System. The new tank will be a like in kind replacement and will be relocated in the same general area. It will continue to discharge to the Wastewater Treatment System. While employment for these two specific converting lines will increase, the overall number of employees at the facility will continue to be less than the past. So the sanitary flow and load will be consistent with the representations in our permit application. We do not feel that this change will result in a change in loading to the Wastewater Treatment System and would like to request that the agency consider this a "minor revision to the existing treatment system" as allowed by Reg. 6.202(C).

Should you need any additional information, please contact Sarah Ross at (870) 567-8670 or by email at sarah.ross@gapac.com.
