RE: Georgia-Pacific Toxicity Reduction Evaluation Action Plan
NPDES No. AR0001210 AFIN: 02-00013

Dear Mr. Cutbirth

Thank you for your timely submission of the Georgia-Pacific Toxicity Reduction Evaluation Action Plan. The Plan has been reviewed, and a few items need to be addressed. Please address the following items and submit a revised TRE plan by September 15, 2011.

4.1 Assembly of Facility Information

According to the permit, the effluent is made up of "process wastewater (Paper Mill, Plywood Plant, and Studmill operations), sanitary wastewater, landfill leachate, site stormwater¹, chemical plant, building products, treated effluent from the City of Crossett, truck wash, backwash wastewater, and product stewardship waters".

Due to the make up of the effluent, the facility may want to ensure that the following are not excluded in the compilation of Sampling Data; stormwater and rainfall data, the City of Crossett's effluent data, and landfill leachate data.

No specific revisions needed in the TRE plan.

7.0 Project Organization

Please include who will be responsible for compiling and reviewing the information specified in Section 4.1.

If you have any questions, please contact myself or Sarah Clem.

Sincerely,

Mary Barnett
Ecologist
