Tate,

I pulled the data from USGS Station 07364100. This station is 3.5 miles below Felsenthal Dam, 0.5 mile above Coffee Creek, and 2.1 miles above state line. The harmonic mean was calculated from the data. The 7Q10 was determined by StreamStats. See the attached excel file. The second worksheet shows the streamstats results.

Shane Byrum, Engineer

Shane,
Do you have available the harmonic mean and 7Q10 for the Ouachita River at Felsenthal L&D?
Thanks
