**Subject:** Melbourne AR0020036

Marysia:

Regarding the Melbourne renewal, the following corrections are in order:

ITEM 1

The facility Outfall 001 corrected coordinates are:

LON: 91° 55' 39"

LAT: 36° 03' 33"

I have checked the facility coordinates and they are correct.

ITEM 2

Permit 4575-W for land application of biosolids: The operator has no specific information as to this permit; information was brought forward from a previous application dated 1999. Land application is actively part of the Melbourne operation - if an additional or new permit is required for this activity, please advise.

ITEM 3

The parschall flume effluent flow meter is located prior to the cascade post aeration. The effluent sampling point is just prior to the outfall to Mill Creek.
