Re: LR05-5857 Mountain View Wastewater Treatment Plant

Dear Mr. Shafii,

Per our phone conversation this morning, I'm submitting this letter to your office to request an exemption for the need to resubmit a revised construction permit to add re-aeration to the treatment process at the Mountain View wastewater treatment plant work that is in construction.

The plant has an existing aeration basin that is currently in use when needed. The current construction drawings call for this process to be bypassed in the future, once the new oxidation ditch gets online; however, we would like to add a change order to the project to include additional piping to route the water stream to this existing basin and continue the re-aeration treatment of the wastewater as needed.

No change to the existing equipment will be made, but for quick reference the equipment consists of an Aire-02 aerator with a 5 HP motor that adds 2.5 pounds of oxygen per horsepower-hour.

If you have any questions or comments, please call 501-371-0272 or email [Jdoyle@McClelland-Engrs.com](mailto:Jdoyle@McClelland-Engrs.com).

Sincerely,

John Doyle  
 Project Engineer
