Re: Construction Certification for:
State Construction Permit No. AR0036536C, City of Greenbrier WWTP
NPDES Discharge Permit No. AR0036536, City of Greenbrier WWTP

Mrs. Fuller,

The Greenbrier Wastewater Treatment Plant (WWTP) is fully constructed and functioning properly. The New WWTP has been constructed in accordance with the plans and specifications previously approved by the ADEQ. The new WWTP is currently being used as the primary source of treatment of wastewater from the city. The lagoons are no longer contributing effluent to the outfall and are now being used for sludge storage. The Operator has also been provided an Operations and Maintenance Manual for the system. Tyler Group, Inc. continues to provide onsite assistance to ensure the plant is operating properly and the staff are knowledgeable of the system.

Tyler Group, Inc. on behalf of the City of Greenbrier requests the termination of State Construction Permit No. AR0036536C. This letter is also being submitted to satisfy the requirements of Condition No. 10 of Part II of Permit No. AR0036536 such that the City of Greenbrier is no longer required to submit two Discharge Monitoring Reports for the WWTP. Please acknowledge that this letter satisfies the requirements of Condition No. 10.

If you have any questions, please feel free to contact via email at stephen@tylergroup.net or telephone at (501) 329-1400.

Sincerely,

Stephen Hogan, PE
Staff Engineer
