RE: Notice of Termination, NPDES Permit No. AR0038822, AFIN 46-00005

Dear Mr. Cole:

In accordance with the modification of NPDES Industrial General Permit (IGP) tracking number ARR00B800 to include Outfall 001, the facility is hereby notified that the subject NPDES Individual Permit Number AR0038822 was terminated effective August 9, 2013 (i.e., the modification date of the IGP tracking number ARR00B800).

Outfall 001 was previously permitted under the individual discharge permit AR0038822. Based on the order and agreement in the Consent Administrative Order LIS No. 13-039, the facility was required to have a registered professional engineer perform a review of the site and the Best Management Practices (BMPs) in place to recommend additional controls to decrease TSS, BOD, COD, and Zinc sources in the stormwater runoff. This review was completed and the engineering report was submitted to ADEQ on July 19, 2013. The report certified that no process wastewater is being discharged from the site through Outfall 001, and the professional engineer believed that all feasible BMPs have been exhausted and that there was no knowledge of or recommendations for any additional BMPs that would significantly further reduce the levels of these parameters in the effluent from Outfall 001.

If you have any questions concerning this matter or need additional information, please feel free to contact the NPDES Section at (501) 682-0622.

Sincerely,

Ryan Benefield, P.E.
Deputy Director
