Subject: re: Re: sludge application condition in NPDES permit No. AR0044016 - North Central Unit

Dear Mr. Starks,

This e-mail is written in reference to our phone conversation last Friday. In accordance with the NPDES permit AR0044016 issued on January 31, 2011 the approval to land apply biosolids under this NPDES permit is limited to a maximum of two (2) years after this permit's effective date. Based on Conditions 6 and 7 of Part II a separate land application permit was to be obtained within this time period or application of biosolids was to cease. Furthermore, an application for authorization to land apply biosolids was to be submitted to the ADEQ within one hundred twenty (120) days after the permit's effective date (no later than May 31, 2011). A review of the Department's records indicates that the application for a state permit was received on June 6, 2011. This application was reviewed and determined to be incomplete on June 23, 2011. Information to satisfy the deficiency was requested by July 23, 2011. This letter can be found here:

http://www.adeg.state.ar.us/ftproot/Pub/WebDatabases/PermitsOnline/NPDES/LTR/5124-W_Incompleteness%20Letter_20110623.pdf

Since the required information was not received by due date, your application was cancelled and returned to you with the letter dated 09/13/2011. This letter can be found here:

http://www.adeg.state.ar.us/ftproot/Pub/WebDatabases/PermitsOnline/NPDES/LTR/5124-W_Cancellation%20of%20Application_20110913.pdf

As discussed please note that the land application will have to cease on February 1, 2013, unless you receive coverage under a separate state land application permit from a No-Discharge Section. Please contact Stephen Hogan of No-Discharge Section of the Water Division if you have any questions.

Thank you,

Marysia
