Subject: Opposed to Paradise Valley sewage facility

My name is Donna Forrester, I have lived in Roland, for 30 years. I inherited the land I live on when my parents passed away. I have some of my children and grandchildren living also on this property. My land will be directly impacted by this facility. I don't want my children or grandchildren exposed to this. Mill Bayou runs throughout my property. We fish and hunt on this property, this sewage will back up on my land, definitely when it rains. I continue to be concerned with how a project like this can move forward knowing how it floods. I believe this is your job to make good decisions based on all the facts. I have provided numerous photos showing how water backs up when we have a heavy rain, it takes days for it to go back down.

I am totally against this project. I think we also need to consider this development as a whole; they intend to build this with all the bells and whistles to address fire prevention within this development. Large pipes, multiple hydrants will be installed, but when meeting with the Fire Dept here, the **water pressure here can not support this**. This is another reason why I am against this project; sounds to be they have put the cart before the horse. So, you see it's not the subdivision meeting the standards, our water company is unable to support this without major upgrades which will be costly. We currently have the same issue with the existing subdivision that was built a few years ago by the same developer. It is all about making good decisions for everyone, not just a few.

Please look at all comments, review all pictures, look at the flood plain map and put yourself in my place, what would you want for your family?
