Dear Mr. Khan,

I ask that ADEQ deny the permit for the sewage treatment facility for Paradise Valley and I also request a public hearing on this issue if/when that time comes. Mill Bayou is not an appropriate use as a sewage facility's pipe - in this location especially.

Milk Bayou IS NOT a stream that has continuous flow. It is a bayou. It flows when there has been a hard rain. Most of the time the water sits and creates bogs. The location of the proposed sewage treatment plant is in a low lying area. On maps that area is designated as wetlands. In other words, the sewage will just sit there until there is rain enough to move it out. In the summer months there is virtually NO flow. So as residents of Roland we would smell the treatment plant to the detriment of outdoor life, wildlife, etc. Imagine wildlife and farm animals drinking out of Mill Bayou in August and September!

ADEQ members would not want a sewage treatment plant in their backyards anymore than the developer. But as residents we would have to live with it. Pay more in taxes for improved infrastructure. One example: Maumelle Water's pipes are original to Roland!

As a side northwest Pulaski county and west Pulaski County are still gorgeously undeveloped. It is the best part of the county. One can go to these areas and bike, hike, fish, and simply enjoy the outdoors. We have Pinnacle Mountain State Park! The rest of Pulaski county should be saved from unscrupulous developers.

As a side northwest Pulaski county and west Pulaski County are still gorgeously undeveloped. It is the best part of the county.

Sincerely,

Cheryl Killingsworth
