Dear Mr. Khan,

I ask that ADEQ deny the permit for the sewage treatment facility for Paradise Valley and I also request a public hearing on this issue. The proposed sewer treatment plant will be in between my neighbor and I so we will have to smell the horrible smell every day. Mill Bayou is a protected Water of the United States and a source of life-giving water for animals and people within the Mill Bayou Watershed and therefore is not an appropriate use as a sewage pipe which will poison our waters and threaten our health. This developer is documented to be a "bad actor" with ADEQ and should not be allowed to install yet another failed sewage facility in Roland on Mill Bayou and not especially when the developer has other options. The existing sewer treatment plant for Water View runs through our farm land and I know from experience how it smells and how it affects the water quality. The storm water runoff is another issue. Every time it rains three out of my five acres flood making them non accessible. This kind of development will only make this worse. My family also owns 50 acres in the heart of Mill Bayou that we use for recreation and duck hunting. Having a sewer plant discharging into this water will ruin this and cause the property value to plummet. Please do not allow another sewer plant to be installed on Mill Bayou.

Sincerely,

Robbie Hudson
