Dear Mr. Khan,

In visiting and getting feedback from the Roland community there are several concerns regarding The large scale Paradise Vally development. #1 concern in visiting with people is Arkansas's weather patterns regarding washout of these types of sewage plants. In Arkansas we have long periods of dry weather and then washout rains that will infiltrate all the chemicals/sewage into the ground water that we drink and use to bath. This will increase the need to treat our water unnecessarily to get it to where it's usable and that's not acceptable. #2, The sheer demand to supply water to all these homes will increase cost for the people of Roland.

I ask that ADEQ deny the permit for the sewage treatment facility for Paradise Valley and I also request a public hearing on this issue if/when that time comes. Mill Bayou is not an appropriate use as a sewage facility's pipe - in this location especially.

Sincerely,

Zach Casto
