**Subject:** Sewage facility dumping into the Mill Bayou

Good afternoon. My name is Robbin Waggoner and I live at 21320 Roland cut off Road in Roland Arkansas. We have land out here with a lot of horses, cattle, goats, ducks, chickens and dogs. This property already is a victim to flooding more than half of the acreage several times a year with rain. We cannot afford to have such dumping flow over onto our property as it would be a toxic danger to our animals and land in which they depend on. We understand the need of sewage facility but not in this area. This area is not at all an appropriate choice for such dumping.

We ask you to strongly and boldly stand against this choosing another area that it would not bring harm or detriment to any persons or animals or land thereof.

If you do so choose to continue with this project in this area we will have to choose other legal means in attempt to stop such a travesty.

Please consider if this was your home and you were animals and your land that you depended on.

Sincerely, Robbin Waggoner

**Subject:** Deny Paradise Valley draft permit No. AR0053210

Dear ADEQ,

I respectfully request that ADEQ deny the permit being considered for the Paradise Valley sewage facility. There are inherently flawed issues with the current permit and site location that cannot be resolved:

Maumelle Water Corporation has asked for an impact study to their aquifer prior to permitting. We also need to know what effect future sewage facilities will have because once one is allowed, more will follow. There is already a plan for a second 50,000 gpd maximum treatment plant as the development reaches full build-out. Add to this the stormwater runoff coming from the same developer's Waterview Estates diversion ditches and the premature clearing of land at the Paradise Valley site.

Mill Bayou is a slow moving water body and will always be. Treated sewage will sit and hazardous algae blooms will form. Rainstorms will cause treated sewage overflows onto other properties and is an infringement on the property rights of others.

The applicant is an ADEQ "bad actor" and there can be no second chances knowing we can expect more of the same non-compliance issues.

For these reasons and more, the ADEQ must deny this permit.

Thank you,  
Robbin Waggoner
