---

This email comes to you after learning from a cousin about a proposed CAFO near the river. Although our permanent residence is far from Arkansas, it is our times on its rivers, especially the Buffalo, that comes home with us and remains in our hearts. We are "home" right now on Spring River, appreciating all this time of year brings to the "Natural State."

The thought of the River's pristine water becoming a version of a CAFO so-called "lagoon," brings shudders and shouts.

Please do not risk polluting a national gem. CAFOs are not natural --at all.
