Subject: C&H Hog Farm Permit Comment
Date: Monday, March 28, 2016 7:31:51 AM

The C&H Hog farm should be allowed and encouraged to continue its operations in Newton County. This is a family farm that has met or exceeded all requirements to ensure that it doesn't pollute the Buffalo River or any other stream or area. Practically all of the so called "environmentalists" who oppose this farm live at least 100 miles away and understand little about how hogs are raised, how the waste is disposed or, or the ecology of the Buffalo River Watershed, but rather they operate on emotions, void of any scientific evidence to support their claims.
