Subject: I oppose the NPDES General Permit (ARG590000)
Date: Tuesday, April 12, 2016 12:26:59 PM

As a wildlife biologist and concerned citizen, I oppose renewal of the NPDES General Permit (ARG590000) published on March 15, 2016 in the Arkansas Democrat-Gazette.

This permit has already resulted in the siting and operation of one hog farm that puts the Buffalo River at significant risk. CAFOs are point sources of immense amounts of pollution. No additional such operations should be permitted, until and unless it is proven that they will not release ANY pollutants into our water, air or land.

Sincerely,
Janine Perlman, Ph.D.
Alexander, AR
