Jamal, FYI. The Commission office is starting to get comments on the CAFO general permit.

Becky Keough  
ADEQ Director

Ms. Keough,

Please add my name to the list of the many thoughtful and reasonable Arkansans who oppose the renewal of the NPDES General Permit (ARG590000) for operators of CAFOs in Arkansas. After all the attention, controversy, public outcry, and tax-payer funded litigation surrounding the CAFO near Big Creek in Newton County, it must be obvious that this permitting process is flawed and requires further review and revision.

As the leader of the organization entrusted to "protect, enhance, and restore the natural environment for the well-being of all Arkansans", surely you can understand the risk posed by the C&H manure spreading near tributaries of the Buffalo River. Please ensure that a similar situation never happens again.

Sincerely,  
William Mills
