Subject: C and H Hog farm

Dear ADEQ:

This is to reply to the issue of whether a permit should be given to C and H Hog Farm so they can empty to Hog Waste Lagoons to put liners in. I am very concerned with what will happen to the Hog Waste in the lagoons, I suppose it will be sprayed on more fields? I think it is a terrible idea to spray hog waste on fields to begin with and especially in the Mt. Judea area where it will end up endangering the waterways of that area, including the Buffalo River. This year has been especially wet and it seems like a disaster waiting to happen. I think the hog waste should be shipped to Cargill's headquarters so they can find a hog waste solution. This is a terrible problem and the citizens and state of Arkansas should not be the ones dealing with hog waste. It is time to empty the lagoons but not on or in our state.

Sincerely,

Judi Nail
