Subject: Comment - C & H vac-tanker truck
Date: Tuesday, April 14, 2015 11:04:01 AM

To whom it may concern,

I request that the C & H Hog Farm proposed modification of their Nutrient Management Plan to allow land application of hog wastewater from Waste storage Pond 2 by tanker-wagon be denied.

It is not appropriate and it should not be permitted for C & H to use a vac-tanker truck to apply hog wastewater to any of the fields from Pond 2 without reliable, accurate information about the content of the waste - the amount of Phosphorus, Nitrogen and other nutrients and without reliable data on the level of nutrients, Phosphorus and Nitrogen already applied to some of the fields.

I use the Buffalo River for recreation and do not want to risk damage to this great natural resource.

Thank you for the opportunity to comment.
