I feel like c&h hog farms has done nothing but be proactive in preventing any possibility of any spills or run off to the waters of the buffalo River

I as a fellow farmer ask you to let them do the changes they are willing to do on there own Farmers are people who do what ever it takes to get the work done with out these type we as a people will be hungry some where down the line !! Please keep this in mind when looking at any mater that is being pressed by any group who has no farming experience thank you
