Re: Tracking Number ARG590001; AFIN: 51-00164

Dear Mr. Henson:

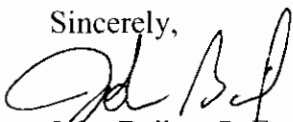

The 2014 annual report as required by the referenced permit was received on January 27, 2015. In accordance with Department policy, your report has been reviewed and determined to be incomplete. Please submit the following **within twenty (20) days of this letter**:

- An aggregate Phosphorus Index spreadsheet for fields that received multiple applications over different seasons in the 2014 calendar year.

Additionally, there are discrepancies among the submitted report and the information the Department currently has on file concerning the number of nursery pigs, the available acreage, and the total manure, litter, and wastewater generated by the facility. These discrepancies are outlined in a table on the reverse of this letter.

Thank you for your cooperation in this matter. If there are any questions concerning this submittal, please contact Casey Vickerson of my staff at (501) 682-0653 or by email at vickerson@adeq.state.ar.us.

Sincerely,

John Bailey, P. E.
Permits Section Branch Manager
Water Division

cc: Jason Bolenbaugh, Inspection Branch Manager
Richard Healey, Enforcement Branch Manager
File

Discrepancies:

	Information from NOI and NMP currently on file with ADEQ	Information from 2014 Annual Report
Number of nursery pigs	4000	750
Available Acreage	630.7*	606.9
Total Waste Generated	2,090,081 gallons	2,614,059 gallons

*According to a response to an inspection report dated September 30, 2013, land application activities have ceased on Field 5 until a map discrepancy is resolved. Therefore, 605.8 acres is the actual acreage available for land application on file with the Department.
