Subject: Comment on C&H Modification Request:ARG590001. AFIN51-00164
Date: Friday, August 07, 2015 12:38:38 PM

I am writing today to ask that you deny the above mentioned permit modification by C&H Hog Factory until adequate measures are taken to monitor and eliminate ANY ground water contamination that could result due to the construction and installation of liners in the existing ponds. This whole process from its beginning to now, has been flawed by secrecy and by not notifying the public about what is about to happen in their immediate area. For that reason alone, this modification should be denied and a public hearing held, so the public can be educated on this change in the disposal of the hog waste. And the burning of the gas near the school? Shouldn't this be explained to the citizens of the area on how this will effect their air quality? Covering the already hog waste ground with plastic liners on top of karst topography and the possible leakage of said liners? This should all be shared with the public before any changes are allowed at this Hog factory. Please deny this request and schedule a public hearing. Thank you for your consideration, Bill Pettit, PO Box 15, Cotter, AR 72626
